**Biogeochemistry of Anthropogenically Contaminated Sites**
Controls on metal mobility in contaminated sites (Duckworth, Hesterberg, Montoya)
Bioremediation of organic contaminants (Hyman, Nichols)

**Hydrologic and Edaphic Controls on Wetland Processes**
Nutrient and contaminant dynamics in hydric soils (Vepraskas, Emmanuel, Lindbo)
Hydrologic function of restored wetlands (Vepraskas, Emmanuel)
Pyrogenic effects on soils and ecosystems (Hoffmann)

**Hydrogeochemical Approaches to Water Resource Protection**
Mobilization and transport of anthropogenic and geogenic contaminants (Polizzotto, Amoozegar)
Dynamics of bacteria and agrochemicals in surface and groundwater (Gannon, Graves)
